

Control
everything
in your
home, right
from your
phone
or tablet.

Move into the future of home automation with **On Controls**, the award-winning app that turns your iPhone, iPad, iPod touch, or Android device into a universal remote that controls all your electronics. Wouldn't it be great if you could control everything from one convenient, easy-to-use device? Put the pile of remotes away in a drawer and simplify your life!

Control Everything In Your Home

Right From Your Phone or Tablet.

Control Almost Anything

On Controls can control it almost anything:

- Blinds
- Lights
- Television
- Surround Sound
- Home Theater
- Music
- Door Locks
- Fireplace
- Heating & Cooling
- Much More!

Use What You Have

Don't buy another so-called "universal" remote control. Use On Controls to turn the phone or tablet you already have into a beautiful touch-screen remote that truly is universal! You'll always have your remote nearby!

Just For You

Finally, a remote that has buttons where you want them. Tune to a favorite channel by pushing a single button. Press "Living Room" to turn your whole system on. Press "Watch Movie" and relax as your lights dim and the movie starts.

Truly Wireless

On Controls uses your Wi-Fi network so you don't have to "point" your remote. Kick back and control equipment in a cabinet, in another room, or on your deck – from the phone or tablet you already love!

Stay Current

On Controls is the last remote control you'll ever need! Whether you change from cable to satellite, buy a new Blu-ray player or HDTV, or upgrade your phone or tablet, On Controls will grow with you and your needs.

Talk to us about simplifying your life with On Controls!
