

ON CONTROLS ADDS POWERLINE CONTROL SYSTEMS TO PARTNERS IN CONTROL COOPERATIVE PROGRAM

INTEGRATORS CAN RELY ON COMPATIBILITY BETWEEN ON CONTROLS AND PULSEWORX® GATEWAY

Detroit, MI November 4, 2015 – On On Controls (www.oncontrols.com), a leader in cloud-enabled smart home and commercial control solutions for professional installers, has announced today the addition of Powerline Control Systems to their Partners in Control cooperative program. The Partners in Control program has been created to achieve seamless compatibility between the On Controls platform and a vast array of connected device manufacturers from related residential market applications such as audio, video, HVAC, security, lighting control and others.

The Powerline Control Systems (PCS) develops high-quality lighting and electrical control devices for the residential, commercial and industrial markets. PCS provides a complete range of products designed to use standard powerlines to communicate control signals without additional wiring, providing integrators with a flexible and efficient lighting control solution. “The On Controls app is an elegant and attractive interface for consumers—and now integrators can benefit from drag-and-drop simplicity when utilizing the PCS PulseWorx Gateway within the On Controls platform,” said Scott Klodowski, director of sales and marketing for PCS.

“On Controls welcomes PCS to the On Controls Partners in Control program and we are excited to offer this high level of efficiency and advanced functionality to our network of professional integrators,” commented On Controls’ Director of Control Jeff Skalny. “The PulseWorx driver works with UPB (Universal Power Bus) devices, enabling integrators to address their client’s lighting control needs within a wide array of price points.”

The On Controls Partners in Control program will help bring best in class manufacturers and integrators together in the rapidly growing connected devices marketplace. Interested manufacturers can learn more about the Partners in Control program by contacting Jeffrey Skalny at: jeff@oncontrols.com or 313-373-7680.

ABOUT ON CONTROLS

On Controls brings the convenience, luxury and security of advanced control and automation technology for residential and commercial applications to the Apple and Android phones and tablets already familiar to millions of users. A Wi-Fi-based platform that won the CEA 2014 Control Product of the Year award amongst other accolades, On Controls leverages the efficiency of the cloud, enabling integrators to deliver more features and better service to their commercial and connected home clients. From a single room to the largest applications, On Controls allows integrators to initialize, upgrade, add new features and sync remote setups to a client's tablet or phone via a web portal from anywhere in the world. On Controls is an intuitive, reliable, robust, and reboot-free system that will simplify your life!
